High on performance and versatility, Elan is the ultimate inline glass system designed to meet the uncompromised needs of exclusive applications where the washroom is a vital part of the overall building user's experience.

Elan is the ideal system for exclusive multi-use applications combining washroom, showering and changing in a wet room environment. Architectural in form and scale, Elan is engineered to work in many different configurations and features striking fixings and internal headrail profile, fully compatible with a range of glass panel options.

Cubicle Height

The Petal sales team and technical advisors are available to offer helpful advice at every stage of your project. To help you plan and discuss your project with us we have illustrated some typical cubicle layouts with details on components and sizing.
