The profiled aluminium pilasters of this Fin Plus cubicle system make a strong architectural statement, guaranteed to bring a sense of quality to any washroom.

The addition of the overhead panel gives a full height appearance for enhanced privacy, adding a further sophistication to this system. This highly adaptable inline system accommodates almost every possible configuration with style including floor to ceiling installations, inward and outward openings plus selectable performance for wet or dry applications.

Fin Plus complements a range of finishes making it a popular choice for all types of public applications. Whilst full of features, this full height option has been designed and engineered as a mid price range option, making it a realistic specification for a range of projects where enhanced privacy is preferred.
