Doweled fittings  
Tamper proof fixings

## Sprint Plus is a robust full-height cubicle system designed for changing, shower, and toilet applications.

This hard wearing solution offers the capabilities required for busy changing environments with the enhanced privacy afforded by a full-height system. With standard height doors and matching overhead panels, heights of up to 3 metres are achievable.

Sprint Plus is a semi-framed system with robust profile channels and headrail, allowing the system to be tailored to the individual design considerations of each project.

The floor-mounted pilaster feature and three hinges per door provide exceptional stability – ideal for changing room environments subjected to the rough and tumble of sporting play.
